Mission Statement

Mississippi Action for Progress, Inc. Head Start is designed not only to serve the children, but also to serve as a catalyst for change and development of a broad range of programs, which meet the needs of the disadvantaged community. MAP Head Start is a service program for children and families. MAP serves as a mechanism for increased parental and community involvement to effect change in the local communities and the state.

Philosophy

Mississippi Action for Progress, Inc. represents a cross-section of Mississippians working for and with disadvantaged children and their families to ensure a brighter tomorrow for the state and nation. MAP believes that every child deserves a head start in life – an equal opportunity to develop character, talent, mind, body and personality. We further believe that we are to prepare children to function in our society by providing life experiences. As America's greatest resource, children will ultimately determine the destiny of our country. All children have a unique contribution to make to society. MAP is dedicated to maximizing the disadvantaged child's potential for contributing.

The American dream of freedom, justice, and equal opportunity for all is being brought nearer to reality in Mississippi as dedicated MAP personnel interact with other agencies to accomplish this goal.

ORGANIZATIONAL PROGRAM GOALS

- ❖ Maximized opportunities for positive child outcomes and school readiness skills.
- ❖ Expanded growth in programs and program options.
- ❖ Opportunities for staff growth and professional development.
- ❖ Advanced technological development.
- ❖ “State-of-the-Art” materials, equipment and facilities.

OPERATIONAL GOALS

- ❖ Expand and strengthen Head Start's¹ Collaboration System throughout MAP's service area to improve services to families and children.
- ❖ Conduct a multi-media campaign to enhance Head Start's image throughout MAP's service area.
- ❖ Seek funding for program and health services in order to offset the rising costs of child health services due to limited funding through the State's Division of Medicaid (CHIPS)
- ❖ Target recruitment activities for teen parents in Head Start in order to address the high percentage of teen pregnancies in the State.
- ❖ Make extra effort to recruiting and serving single parents in order to provide services and activities to ameliorate negative social consequences of single parent households.
- ❖ Increase parent education activities in order to improve education and literacy rates among Head Start parents.

¹*Head Start* herein refers to both *Head Start* and *Early Head Start* programs.

MISSISSIPPI ACTION FOR PROGRESS, INC. HEAD START COMMUNITY ASSESSMENT 2011-2012

MAP's Community Assessment provides a comprehensive collection and analysis of the Agency's 25 county service delivery areas. The data collected through the Community Assessment is used for program planning, evaluation and guidance. The Community Assessment is required by Head Start Performance Standards, 45CFR 1304.51(a) (1) (i) and 1305.3. MAP conducts a complete community assessment annually.

The Community Assessment provides relevant information regarding the availability of resources for children and families within the context of their local communities. It assists in identifying the strengths and challenges of families. The Community Assessment is a holistic tool that helps to drive the Agency's Planning System. Information is compiled and analyzed, then used by the staff and Governing Bodies to develop Head Start program goals, options, objectives, and plans.

Program objectives and program designs are based on a systematic and in-depth review of MAP's 25 counties service area, including each county's unique characteristics, which identifies strengths, resources and needs. The methodology for collection of data requires the involvement of all staff, program parents, and the community at large. Staff complete surveys to assess program operations; parent's complete surveys to evaluate program services; the communities were canvassed and surveyed to evaluate services and recommend services before the start of this assessment. Resources and data used for the Community Assessment include:

INTRODUCTION

On September 13, 1966, a group of twelve culturally diverse men chartered **Mississippi Action for Progress, Incorporated, acronym MAP**. For over forty-five years MAP has been committed to delivering the highest quality service to disadvantaged communities, children and families in the state of Mississippi. Eliminating the paradox of poverty has been MAP's main objective in twenty-five counties in Mississippi. Uniquely, the Head Start Agency is significant in the program service area, which extends north to the Tennessee state line, south and west to the Louisiana state line, and east to the Alabama state line. MAP Counties include:

Alcorn	Lauderdale	Perry	Warren
Calhoun	Lee	Pontotoc	Winston
Chickasaw	Leflore	Prentiss	Yalobusha
Claiborne	Lincoln	Scott	Yazoo
Franklin	Monroe	Tippah	
Hancock	Neshoba	Tishomingo	
Itawamba	Pearl River	Union	

MAP, Inc. is a multi-purpose; community based program that provides Head Start and Early Head Start services to 6,162 children and 29 expectant mothers in various program options. It is the State's largest Head Start Program in geographic area as well as the largest in number of children served.

MAP, Inc. geographic locations serve children and families in twenty-five (25) counties in Mississippi. Some of these counties are in the extreme northeast corner (Alcorn, Lee, Itawamba, Pontotoc, Prentiss, Tippah, Tishomingo, and Union) bordered by Tennessee to the North and Alabama to the East. In the southern portion of the state, Pearl River and Hancock border the Louisiana state line, as well as Franklin, Lincoln, and Claiborne in the southwest and Perry County east to the Alabama state line. Leflore and Yazoo Counties lie to the northwest in the Delta region and Warren along the Mississippi River. To the eastern section of the state lie Lauderdale, Neshoba, Scott, and Winston Counties which borders the Alabama state line. MAP also serves Calhoun, Chickasaw, Monroe, and Yalobusha in the central part of the state.

MAP, Inc. operates a full-day standard center-based model Head Start program serving 5,462 children, a full day/full-year center-based model serving 246 children, Early Head Start serving 266 infants, toddlers, and pregnant women, a blended services partnership model serving 134 children with public schools, and 83 children in private Daycare centers with a total funded enrollment of 6,191.

The 2010-2011 school year actual racial make-up of MAP actual enrollees indicated that African Americans consists of 4,429 or **68.3.0%**, Caucasian 1,631 or **25.1%**, American Indian/Alaskan Native 9 or **0.14 %**, Asian 5 or **0.08%**, Bi-racial 95 or **1.5%**, Other 316 or **4.9%**, Hawaii 1 or **0.02%**. Early Head Start actual racial make-up for the 2010-2011 school year consisted of; 249 or **86.2%** African Americans, 32 or **11.7%** Caucasians, 4 or **1.4%** Bi-Racial, and 4 or **1.4%** Other. MAP actual enrollment for the 2010-2011 school year was 6,486 for Head Start and 289 for Early Head Start.

Research data continue to show that the American population has tripled during the 20th century. The Hispanic and Latino American populations account for over half of the national population. Since the passing of the Immigration and Nationality Act of 1965 a vast majority of immigrants have come from Latin America and Asia. MAP continues to serve a diverse number of families throughout Mississippi. Hispanic and Asian families' enrollment increased during the 2010-2011 school year. The numbers of enrolled American Indian and Alaskan Native families have remained consistent with no significant increase in the past few years. MAP has revised and expanded its multicultural program to include additional consultants and bilingual staff. MAP's bilingual coordinators and community partners assist our non-English speaking families with the acquisition of quality comprehensive services. Community Partnerships have been expanded to assist in the provision of services for non-English speaking families. Program materials are available in Spanish as well as English. The Agency's multicultural and bilingual programs are continuing to expand to meet the needs of enrolled families.

MAP seeks every opportunity to provide quality services to at risk children and families. The Head Start experience begins with the recruitment and enrollment process. Information gathered in the Community Assessment help to determine program options, guidelines, and requirements for participation in the program. The Recruitment and Selection Plan governs the recruitment, selection, enrollment and attendance requirements for children enrolled in MAP's Head Start and Early Head Start Programs. It was revised in November, 2009, in compliance with the revision of 45 CR Part 1305.3 (effective 4/98). The plan was presented to and approved by the Policy Council in December, 2010. The Recruitment and Selection Plan is updated and approved annually. The Recruitment Plan acknowledges the new eligibility and enrollment rules under the amended Head Start Act.

The Early Childhood Development and Health Services Management Plan ensures that children receive comprehensive services. The focus includes determining child and family health needs, nutritional needs, linking families to medical homes, developmental, sensory, and behavioral screenings. Each child has an individualized plan to assist in progressing to his/her potential.

Family and Community Partnership Management Plan provide procedures for the process of collaborative partnership building with parents and community agencies. Families are linked to various community resources for services. Through this process, family strengths, goals, needs, existing skills, and interests will be identified. Having secured this core of information, an Individualized Family Partnership Agreement will be developed by an assigned family community worker and primary family member(s). Through our comprehensive case management approach, this plan will be tracked and monitored routinely to ensure all services, resources, and assistance is given to help families reach desired goals and meet identified needs within a specified time frame.

Issues Facing Children and Families

Mississippi along with the entire country continues to face an uncertain economy. **The American Reinvestment Recovery Act** provided some immediate relief for families and children. However, the long term impact of the **Recovery Act** is quite debatable in that the economy has not improved significantly over a period of time. Mississippi remains one of the poorest States in the Nation. Its citizens continue to contend with high rates of poverty, lack of adequate healthcare, high unemployment rates, high number of high school dropouts and other adverse economic conditions. The State also experienced severe weather conditions which affected the lives of children and families. There was flooding along the Mississippi River, which displaced many families from their homes for months. In some instances families lost all personal belongings and businesses were forced to close. In MAP's service area Yazoo, Warren, Claiborne and Lincoln Counties were impacted by the flood. The State was devastated by tornadoes this year as well. Several of MAP's counties were effected, namely Alcorn, Chickasaw, Leflore, Monroe, Neshoba, Yazoo, and Tishomingo. The Gulf Coast, which is continuing the rebuilding process from the 2005 Hurricanes Katrina and Rita, has to contend with the recent BP oil spill in the Gulf of Mexico. The economy was adversely affected by the oil spill. The fishing industry was almost ruined.

Mississippi has shown resourcefulness in rebuilding from these disasters as families strive to resume some sense of normalcy. It will continue to take a statewide collaborative system to move Mississippi forward to address the serious economic, social and health issues facing its citizens.

As the world population increases, so does the number of children living in poverty. According to the **National Center for Children in Poverty (2010)**, in the United States, 21% of children live in families with incomes below the federal poverty level. Additionally, 42% of children in the Country live in low income families. Statistics are more troubling for Mississippi in that this same report indicated 30% of children live in poor families in Mississippi. There are 404,827 (54%) children in Mississippi who live in low income families. According to the Federal Government low-income is defined as income below 200% of the federal poverty level. Head Start families usually earn low wages and have limited education which contributes to having insufficient income to adequately support their basic living needs. Additionally, research shows that Head Start families are very mobile as they seek job opportunities. In Mississippi 45% of low income families have at least one parent working full time. Families continue to seek assistance from the State's **Temporary Assistance for Needy Families (TANF)** program. This program provides parents with job preparation, work and other supportive services. **TANF** funds are limited and many families often fail to meet stringent requirements for participation. **TANF** services are available in all 82 counties in Mississippi.

Investing in high quality care for young children is fundamental for healthy child outcomes. Research has shown that early stimulation of the brain in young children leads to higher cognitive development. Research show that poverty, poor nutrition, lack of healthcare and other adverse social issues negatively impacts children's growth and development which could cause them to lag further behind their middle class peers. Breaking the cycle of poverty is a serious challenge for families who have lived below the poverty level for generations. The effects of poverty are long lasting and hard to overcome due to the complexity of factors which causes poverty. Mississippi showed positive progress this past year, in that the percentage of children living in poverty decreased slightly from last year Community Assessment Report. *The United Health Foundation Annual*

Report (2010) for this year listed 31.9% of children under the age of 18 living in poverty in Mississippi compared to 32% reported last year. This positive improvement is encouraging for poor families. Nationally, Mississippi ranked 50th in the percentages of children living in poverty. The number of children under the age 18 living in Mississippi identified as poor increased this year; 28% was reported in last year's Community Assessment compared to 30% reported this year. Poor children are defined as children whose parent's income is below 100% of the federal poverty level.

Mississippi data from the **National Center for Children in Poverty** reported that 90% of young poor children live in families whose parents received less than a high school education. Another 72% of young poor children live in families whose parents received a high school degree. Parents with limited education usually are employed in low wage earning jobs and cannot provide adequately for their families. These young children often miss the opportunity for maximum growth and development during this optimal time of brain development.

Mississippi continues to face the challenges of health disparities among its citizens. According to **United Health Foundation Report**, in Mississippi, obesity is more prevalent among non-Hispanic blacks at 42.9% than non-Hispanic whites at 29.3%. Obesity is a major health challenge for the State with 35.3% of the population identified as obese. Mississippi leads the Nation in obesity. The high percentage of children living in poverty also impact adequate healthcare. This report indicated that 31.9% of persons under age 18 live in poverty. State Health officials are trying to address the high rate of preventable hospitalizations. Poor families tend to seek healthcare in emergency situations rather than as a preventative measure. Other challenges include a high infant mortality rate at 10.3 deaths per 1,000 live births, low high school graduation rates at 63.6%; and lack of primary care physician in rural areas. The **United Health Foundation Report (2010)** indicated that Mississippi continues positive trends of low prevalence of binge drinking at 10.3% of the population, high immunization coverage with 91.6 percent of children ages 19 to 35 months receiving immunizations.

The Mississippi Medicaid program provides health insurance for many Head Start families. Community Assessment data indicated that 5,130 of MAP's enrolled children received Medicaid services and 200 were enrolled in the **State Child Health Insurance Program (SCHIP)** during the 2010-2011 school year. MAP families' participation in both programs increased this program year.

The **Mississippi Department of Vital Statistics**, showed a decrease in the total number of teen pregnancies reported in Mississippi. Last year Community Assessment reported 2,353 pregnancies compared to this year report of 2,180 teen pregnancies. **The National Campaign to Prevent Teen Pregnancies** reported a rank of 50th for Mississippi in overall birth rates (Teens) per 1,000 girls (**see Chart 1**). The number of fetal deaths decreased in MAP's service delivery area. A total of 102 fetal deaths were reported. In MAP's counties, Yazoo and Pearl River counties posted the highest number of fetal deaths with 9 deaths reported. Lee and Leflore counties reported the second highest number of fetal deaths with 8 deaths reported. Also noteworthy to mention is the decrease in induced terminations in MAP's service areas for Mississippi residents. Last year 372 Mississippi residents induced terminations were reported compared to 336 induced terminations reported this year. However, Teen induced terminations decreased in this report showing 184 teen induced terminations compared to 231 reported last year (**see Chart 2**).

The high incidence of low birth weight babies continues to be a healthcare challenge in MAP's counties. A total of 1,304 live births less than 2500 grams were reported this year compared to

1,367, which indicates a slight decrease. The charts indicated an overall decrease in the number of low weight births in the State (**see Charts 3 & 4**).

Teen and single parent families are often linked to a number of negative social and health outcomes for children. These families are more likely to be poor, have lower academic achievement, experience health issues and drop out of high school. Mothers who fall into this category usually have obtained a low-level of education and possess limited skills for job opportunities. MAP's Community Assessment report indicated a total of 5,961 births to unmarried mothers. Lauderdale County for the third consecutive year posted the highest number of live births to unmarried mothers with 649 births. Lee County reported the second highest number of live births to unmarried mothers with 573, followed by Warren County with 477 (**see Charts 5a-c**).

*Figures shown are *by Race of Mother*; Figures for years prior to 1989 are *by Race of Child*.

**Births/1,000 Population.

- ✓ Data shows a decrease in the overall total number of live births in Mississippi during the year 2009 (over 2,000+). Specifically, there was a significant decrease in the total number of live births to *Non-White* Mothers versus *White* Mothers from 2008 to 2009.

Family Profile

MAP's Head Start families' profile mirror the nation; it is becoming more culturally and ethnically diverse. Mississippi has seen a surge in Hispanic population growth as well as with other ethnic groups. One of MAP's goals is to keep the parent involved in the developmental process as the primary educator of their children. The Agency continues to collaborate with parents as partners in the development and provisions of program services. *The Program Information Report* showed that the majority of enrolled children were from single female parent families. This year's Community Assessment reported 5,132 single parent Head Start families, a slight decrease compared to last year's Community Assessment report of 5,172 single parent families. Results revealed an increase in the number of single parent households in the Early Head Start option, with 244 reported single parent families this year compared to 211 single Head Start families last year.

Mississippi's percentage of live births to unmarried mothers increased slightly from 54.4% last year to 55.2% this year. This data is a concern in that single parent homes, headed by females, tend to face more economic and social hardships. MAP's Community Assessment data showed a slight increase in the number of births to unmarried mothers; last year's data reported 53.1% compared to this year's data of 53.7%.

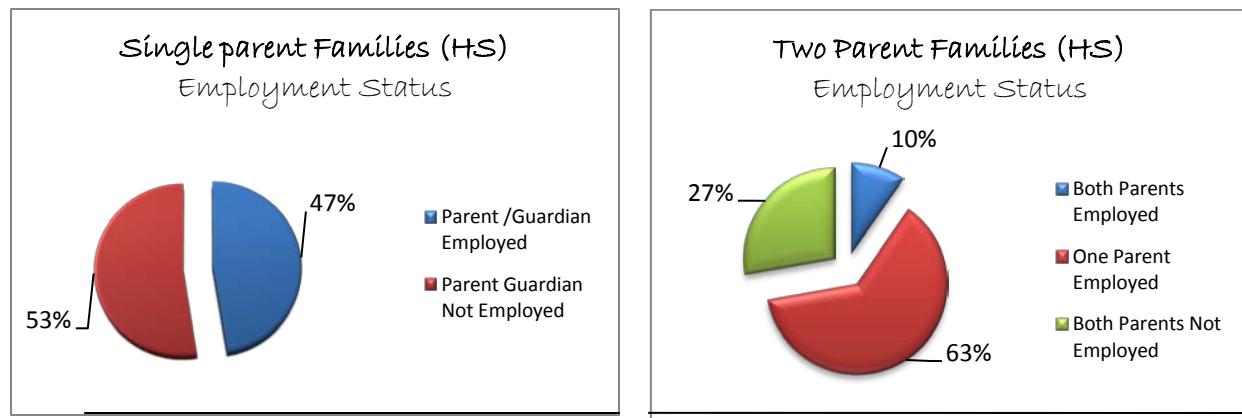

In MAP's service area 11 counties' percentages of births to unmarried mothers exceeded the State's average percentage of 55.2% of births to unmarried mothers. Claiborne County listed the highest percentage of live births to unmarried mothers in MAP's counties, 81.8%. Claiborne County has

reported the highest percentage of births to unmarried mothers for the third consecutive year. Last year Claiborne County reported 81.4% live births to unmarried mothers (see Chart 5a).

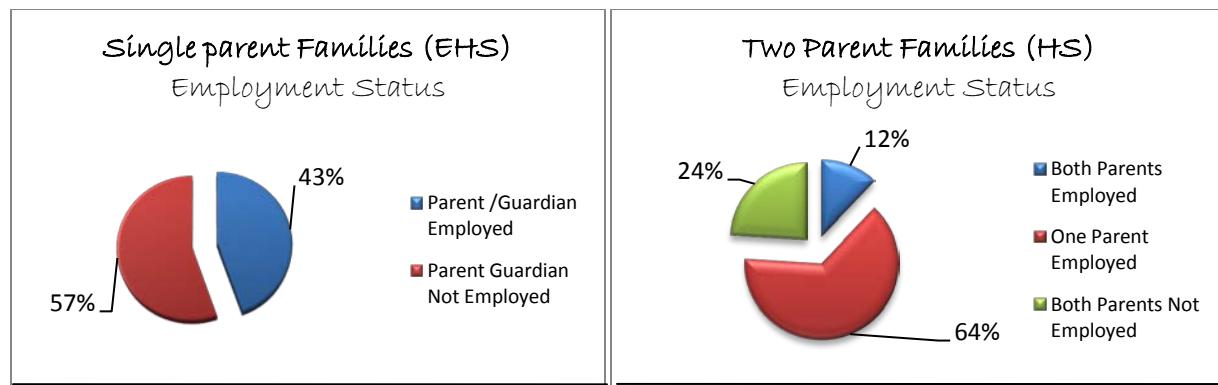

Program information showed an increase in the number of grandparents rearing young children. Grandparents often serve as primary caregiver for various reasons including drug additions, incarcerations, economic issues, and health concerns of parents. MAP Parent surveys and other program data revealed that 26 families were headed by grandparents during the 2010-2011 school year. *The Children's Defense Fund*, reported on January 2011, a total of 3,320 children in foster care services in Mississippi.

MAP provided the opportunity for homeless families to receive Head Start services in accordance to *The McKinney Vento Act*. *The McKinney Vento Act* clearly defines and describes the rights of Homeless Children as it relates to Head Start Services. This year's *Program Information Report* showed that the Agency served ten (10) homeless families during the 2010-2011 school year, compared to twenty (20) homeless families reported in last year's Community Assessment. Four (4) of those families were assisted in obtaining housing. The Agency enrolled eleven (11) homeless children. Homeless family definitions include children and families who do not have a fixed, regular and adequate night time residence.

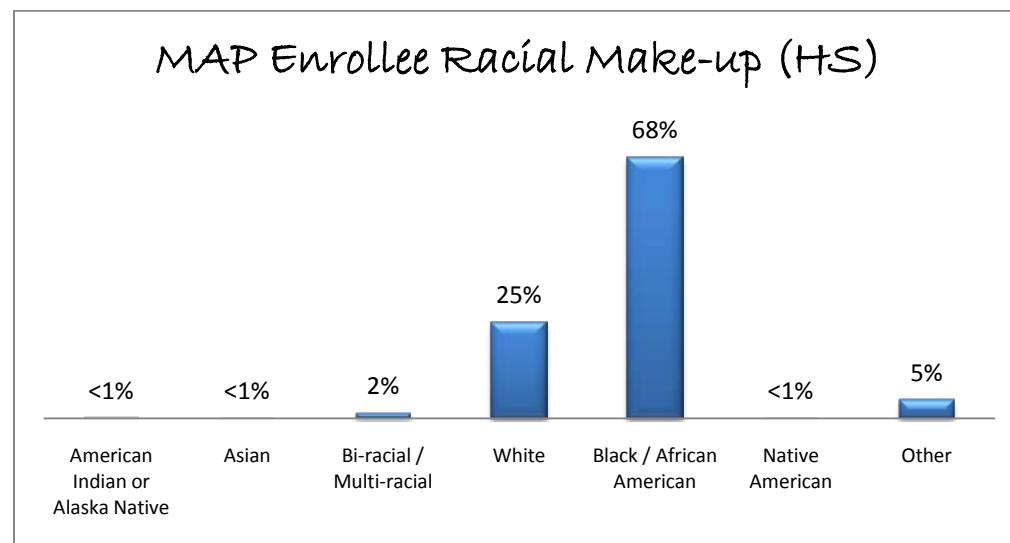

According to the *National Center for Children in Poverty*, low wages and a lack of education contributes to poverty and insufficient income. Data indicated a high percentage of working poor families. In MAP's Head Start Program, of the single parent household served, 47% had at least one (1) parent employed. Of the two parent household, children enrolled in the program, 63% had one (1) parent employed.

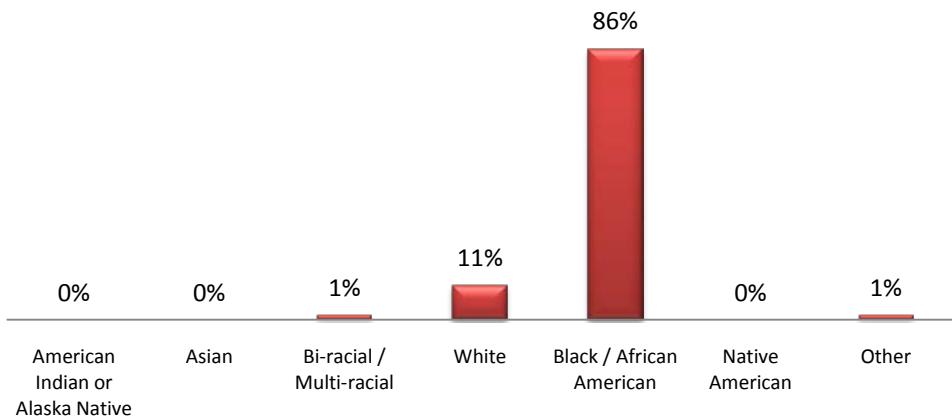

An evaluation of the Agency's Early Head Start families revealed that 57% of the single parent families were employed. These families represent some of Mississippi's working poor families, who often earn a little more than minimum wages, which results in their families' incomes exceeding requirements for certain public assistance. Additionally, eligibility information supports that the majority of families were below federal income guidelines. Early Head Start data showed that all families enrolled in MAP's Early Head Start program with the exception of one (1) were below 100% of Federal poverty guidelines. During the 2010-2011 school year 96.4% of the actual Head Start families enrolled in MAP were below 100% of Federal Poverty guidelines, only 3.6% of enrolled families exceeded 100% of the Federal Poverty guidelines.

According to the *Program Information Report* two hundred forty eight (248) Hispanic or Latino children were enrolled in Head Start during the 2010-2011 school year. Data showed an increase in the number of bi-racial, American Indian and Asian families enrolled this year. MAP's Multi-Cultural Program is designed to address the needs of all enrolled families.

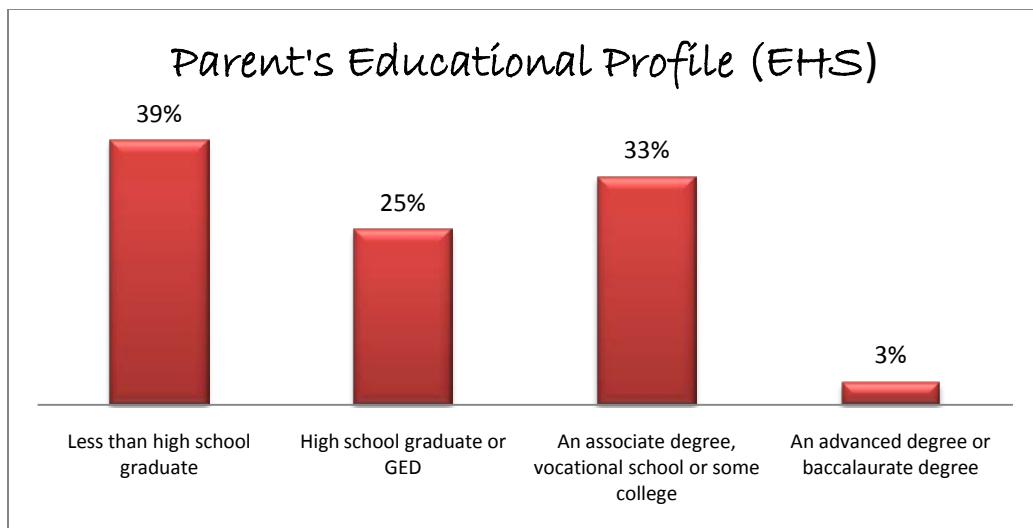

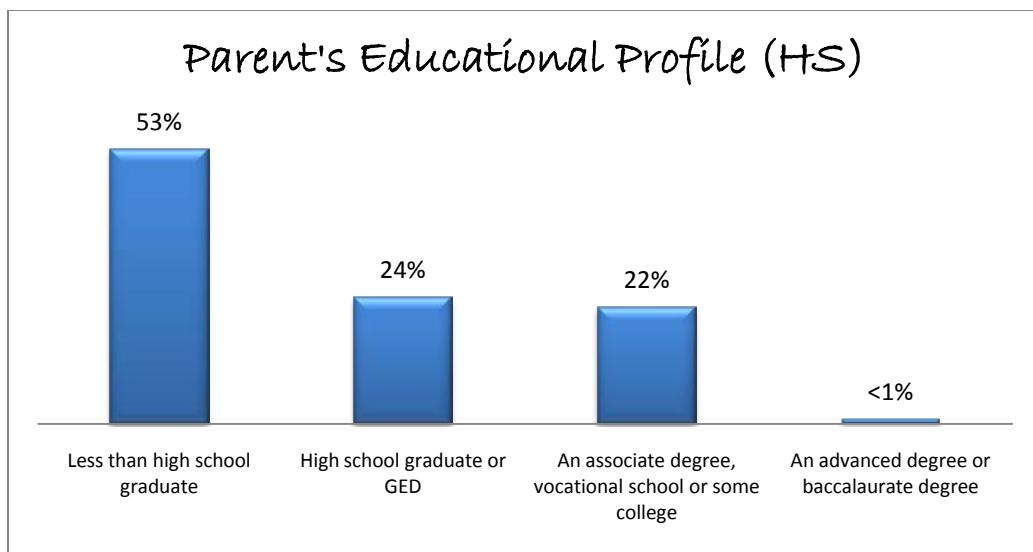

MAP Enrollee Racial Make-up (EHS)

Parent's Educational Profile

Mississippi has a high percentage of working poor families. These families often have obtained low levels of education which limits their employment opportunities. MAP's Family Service division provides support services and programs for families to promote higher levels of self-sufficiency. Program data is carefully reviewed each year to assess the level of enrollees' parents' education level. This information assists with program planning. A comparison of 2009-2010 school year data to 2010-2011 school year data showed an increase in the number of parents who did not obtain a high school degree. The number of parents with less than a high school degree was 3,171 or 53% of enrollees' parents. This number represents a significant increase of enrollees' parents who did not obtain a high school degree compared to last year's report of 46.2% of enrollees' parents. Additionally, 1,478 or 24% of enrollees' parents were high school graduates or obtained a GED certificate. Early Head Start parents' educational profile revealed that 39% of enrollee's families did not obtain a high school degree and 25% graduated high school or obtained a GED certificate.

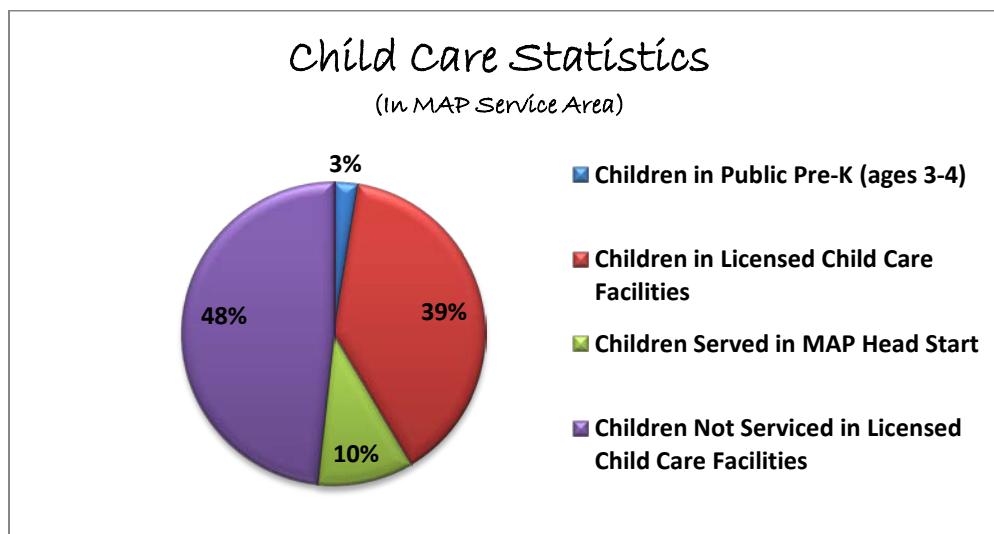

Child Care in Mississippi

A review of Child Care data in Mississippi continues to support that many low economic families contend with challenges in obtaining quality and affordable childcare. Data show that high quality childcare is linked to positive developmental outcome for young children. There is a statewide initiative led by the Governor's office to address childcare in Mississippi. The **Department of Human Services Office for Children and Youth** assists income eligible families with childcare payment. According to the **Department of Human Services Annual Report** parents receive certificates for childcare services. Recipients of childcare certificates are **TANF** participants, parents transitioning from **TANF**, low-income working parents, and parents in a full time education or training programs. Funds from the **American Reinvestment Recovery Act** continue to support childcare services in Mississippi. In addition to childcare, funds received from the **American Reinvestment Recovery Act** assisted the State in the expansion of services of many existing programs that provide services to disadvantaged families.

The **American Reinvestment Recovery Act** (ARRA) has helped to increase the number of children receiving early care and education services provided through Head Start programs and other childcare providers in the state. The Act also proposed Early Learning Challenge Funds competitive grants for states to build high quality learning systems for young children.

According to **Mississippi Kids Count (2011)**, there was 57,928 pre-school age children in MAP's service delivery area. The Mississippi State Licensure Department reported 425 licensed childcare facilities in MAP's counties, a slight decrease from 430 licensed childcare facilities reported in last year's Community Assessment. However, there was a significant increase in the number of children enrolled in licensed Childcare Centers in MAP's service areas this year in comparison to last year's report. Information showed 22,547 children enrolled in Centers this year compared to 17,943 children enrolled in childcare centers last year. Public pre-school programs have also increased in enrollment. School Districts are investing more funds in Early Childhood programs across the State. This indicates a greater need to strengthen and enhance collaboration between all entities that provide services to children. There were a significant number of children in the State who did not receive early care in a licensed facility. It was reported that 27,963 children were not serviced in licensed childcare facilities. Public Pre-K reported an enrollment of 1,493 this school year, a significant increase from an enrollment of 1,164 last year.

Educational Trends

A snapshot of Mississippi's Educational System indicates that the State has to find solutions to the low rate of high school graduation, low academic achievement and the upward trend of high school drop-out rates. Research supports improving high school graduation rates could boost the State's economy within a few years. According to a report from the *Alliance for Excellent Education*, an increase in high school graduation rates would yield potential gain in important factors including individual earnings, home and auto sales, job growth, overall economic growth, spending and investment, tax revenues and human capital. The State Department of Education currently has initiatives in place to improve State curriculum and staff development for educators. The *Mississippi Learning for Educators Initiative* provides educators with quality professional development in their content knowledge and skill area to improve student performance. In MAP's Counties, data show a low percentage of teachers with emergency teaching certificates, which indicate that teachers have required credentials in their subject areas.

The State reported an average of 4% of teachers with emergency teaching Certificates. MAP counties reported 3.5% of teachers with emergency teaching Certificates. Coffeeville School District reported the highest percentage of teachers with emergency teaching Certificates with 23%, followed by Leflore County School District with 19% and Vicksburg Warren School District with 11%. Greenwood Public School District, Meridian Public School District, and Yazoo City reported 10% of teachers with emergency teaching Certificates.

The decline in graduation rates is a serious challenge for the Mississippi State Department of Education and all Mississippians. A recent report from the State Department of Education showed a decline in graduation rates from 71.6% last year to 71.4% this year statewide, for the class of 2010. This slight decrease in dropout percentages is encouraging. School officials reported scarce resources, large class size, staff shortage, lack of involvement from businesses, parents and the community for high student dropout rates. Many school districts are in the process of developing dropout preventions and intervention plans. MAP's service areas also contend with low graduation and high dropout rates. A review of program data indicated that Vicksburg-Warren has the lowest graduation rate of MAP's 25 counties with only 51.7% of students graduating from school. Chickasaw County had the second lowest graduation rate with only 55% of students graduating and the second highest student dropout rate at 25.1%. Yazoo County had the highest dropout rate at 34.2%.

*Cohort of first-time Ninth Grade Students Beginning in 2006-2007 School Year

Accreditation State Rating

The Mississippi State Department of Education implemented a new Accountability Rating system. According to the Mississippi State Department of Education schools and districts will earn classifications ranging from “Star to Failing” with Star Schools and Star Districts reflecting high performance comparable to any school in the Nation. The new classifications from highest to lowest include Star, High Performing, Successful, Academic Watch, Low Performing, At Risk of Failing and Failing. The 2009 Statewide Accountability Rating system was initiated during the fall of the year.

In MAP’s Service area, all public schools have an accredited status level. However, some schools’ performance ratings under the new system revealed challenges. In Region VI, in Chickasaw County, Okolona Elementary School and Okolona High School listed a school performance classification of failing. These schools are of particular interest to MAP in as much as the Agency has enrollment partnership agreements with the schools. Of course MAP is concerned about all schools in its service area with a school performance classification of failing. MAP has developed local education agreements with all school districts within the service area. This year’s percentage of Teachers with Provisional Teaching Certificates in MAP counties listed 3.5% compared to the State’s percentage of 4% of Teachers with Emergency Teaching Certificates.

American College Test

MAP's Community Assessment tracks annually ACT composite mean scale scores for all students for each school district and compare the composite mean scale scores for students enrolled in college prep classes to those students not enrolled in college prep classes. This year's Community Assessment reviewed the Executive Summary of the ACT High School Profile Report for the graduating class of 2010. The report reinforced the need for school districts to require enrollment in college prep curriculum, provide access for all students to take the ACT, and ensure that students take the right kind of courses. The table below obtained from the *State Section I, Executive Summary ACT Profile Report* shows the percent of ACT tested students ready for college-level course work from the graduating class of 2010.

ACT PROFILE REPORT - State: SECTION I, EXECUTIVE SUMMARY		PAGE 6
Graduating Class 2010		Code 259999 Mississippi
Total Students in Report: 26,887		

Figure 1.1. Percent of Your Students Ready for College-Level Coursework

A benchmark score is the minimum score needed on an ACT subject-area test to indicate a 50% chance of obtaining a B or higher or about a 75% chance of obtaining a C or higher in the corresponding credit-bearing college course.

Mississippi Employment Status - May 2011 -

The work force in Mississippi has slightly improved from last year according to reports from the **Mississippi Department of Employment Security**. The **Labor Market Data Report** of May 2011, indicated Mississippi's unemployment percentage at 10% compared to 11.2% reported May of 2010. This data is somewhat encouraging as families seek job opportunities. **Mississippi Economic Policy Center** reports that the extensions of key Federal Stimulus programs are vital to protecting Mississippi's economic recovery.

An assessment of unemployment in MAP's counties indicated that families continued to experience economic hardships due to the lack of available jobs. Information gathered from the Community Assessment showed that two (2) of MAP's counties were listed in the State's Top Ten County Rankings for the highest unemployment rates. Claiborne County with a 17.6% (see chart below) unemployment rate, posted the highest in the MAP's service delivery area. Winston County with a 15.1% posted second with the highest unemployment rate in MAP's service area, and was also listed in the State's Top Ten highest unemployment county ranking. Scott County has been listed in the State Top 10 Lowest unemployment rate for the past four (4) years. Scott County posted an unemployment rate of 8.3% (see chart below) this year. Neshoba County and Calhoun County were also listed in the State Top 10 Lowest unemployment rate at 8.6% and 8.8%, respectively (see chart below).

TANF/SNAP/SSI Services

- May 2011 -

The Mississippi Department of Human Services Temporary Assistance for Needy Families (TANF) 2010 program ensures nutrition, healthcare and other basic needs are met for low-income families according to the Department's Annual Report. The program assists low-income families by providing parents with job preparation, work and supportive services. Data revealed that a significant number of families leaving the **TANF** program were still living at poverty level, in as much as they do not earn enough income to sufficiently support their families. *The Annual 2010 State Fiscal Year (SFY)* report from the *Mississippi Department of Human Services* reported a slight change in the State percentage of families receiving **TANF** services this year at 0.9%, which represents an increase from last year's report of 0.8%. The State received 31,555 applications for **TANF** this year compared to 31,942 applications for **TANF** last year which is a decrease in total applications received. Chickasaw and Yazoo Counties listed the highest percentages of families receiving **TANF** at 1.5%. Claiborne County reported 1.1% of families receiving **TANF**. These three counties exceed the State average of 0.9%.

Families who receive **TANF** benefits have a 60 month limit to receive service unless specifically exempted. Therefore, families have to prepare to transition from the **TANF** program. Families transitioning from **TANF** face new challenges with the present unstable economy. High unemployment rates attest to the lack of available and limited gainful employment opportunities. The State should re-assess transitional activities to help support families as they leave the **TANF** program.

The Mississippi Department of Human Services Supplemental Nutrition Assistance (SNAP) program's goal is to assist families in making healthy food choices within their limited budget. The program also emphasizes the benefits of physical activity. The incidence of families participating in the State's food program continues to increase. Current State data indicates that 19.6% of the State's population participates in the food program this year compared to 17.8% reported in MAP's Community Assessment last year. Nine (9) of MAP's service counties exceeds the State's average percentage of **SNAP** participants. Claiborne County with 33% **SNAP** participants and Leflore County with 32.1% post the highest percentage of **SNAP** participants in MAP's service area. According to MAP's Parent and Community based Surveys, not only do families need assistance with food, but in many areas as they strive to improve their families overall living conditions. Obesity, lack of job opportunities, available and affordable healthcare services, low levels of job skills, literacy skills development, available and affordable quality childcare, and teen pregnancy rates were all identified as areas of concern for families.

The Social Security Administration Supplemental Security Income (SSI) program is a cash assistance program that provides monthly benefits to low-income aged, blind, or disabled persons. According to the Social Security Administration, the maximum Federal SSI benefit usually changes yearly. Nevertheless, **SSI** benefits will not automatically increase in 2011 as there was no increase in the Consumer Price Index from the third quarter of 2008 to the third quarter of 2010. Currently, the Federal benefit rate is \$674 for an individual and \$1,011 for a couple. Of MAP's service counties, Lauderdale County is listed as the highest total recipients of SSI benefits with 3,434 recipients. Lauderdale County also posted the highest number of SSI recipients under age 18 with 718 recipients. The chart below provides a detailed review of **TANF**, **SNAP**, and **SSI** usage by county.

Recruitment

Mississippi Action for Progress, Inc. is committed both by corporate charter and the Governing Bodies to recruit and enroll all eligible children residing within the targeted service area (see Appendix A).

The ***Recruitment and Selection Plan*** which governs the recruitment, selection, and eligibility requirements for enrollment of children in Mississippi Action for Progress, Inc. Head Start Program was revised January 1993 in compliance with the Final Rule on Eligibility, Recruitment, Enrollment and Attendance in Head Start – 45 CFR Part 1305 (effective November 9, 1992; updated April 1, 1998). MAP, Inc. Recruitment Plan acknowledge the new eligibility and enrollment rules under the Amended Head Start Act (section 645 (a) (3) which allows for additional enrollment opportunities for children and families whose income falls into the 100-130% income range and exceed the 10% over income rule. However, based on the Agency's Community Assessment and other program information, the amended regulations will not be implemented in the 2011-2012 school year. The ***Recruitment and Selection Plan*** is reviewed and approved by the Policy Council annually.

The objective of this plan is to ensure that all interested families are given an opportunity to be considered for enrollment. Also, the plan takes into consideration the number of preschool age children in each county, which allows us to serve as many eligible children as possible.

The plan provides a systematic process for the recruitment, selection, enrollment, and attendance of all eligible children within the target twenty-five (25) county service area. The provisions of this ***Recruitment and Selection Plan*** shall be implemented in such a manner that there will be no disruption of services to currently enrolled children, giving priority to enrolling children age four and children with disabilities; filling vacancies within thirty days and assuring continuity of services by allowing Head Start children to remain in the Head Start Program until kindergarten or first grade is available to them. The selection criterion is based on age, income, disability, parental status, and others factors determined by Central Office.

The ***Recruitment and Selection Plan*** provides organization, focus, and uniformity among the fifty-four (54) Head Start centers and Early Head Start sites, which provides opportunities for the greatest number of children to be considered for Head Start services. The plan also provides for blended services through partnership agreement with public school.

A recruitment tracking initiative was used during the recruitment drive for the 2009-2010 and 2010-2011 school years. The recruitment tracking initiative located each potential family for Head Start on a city or county map. The Regional Managers, Director of Research and Development, Center Administrators, Regional Generalists and the Enrollment Coordinator used county maps to monitor where recruitment efforts were to take place. This process helps to ensure that the entire county is canvassed.

Initiatives used to ensure the entire service area was covered by recruitment efforts included:

- The Agency's web site
- Community canvassing and mail outs
- Recruitment announcements (English, Spanish)

- Banner announcements posted on school buses and centers
- Bumper stickers posted on staff, parents, and community vehicles
- Television and other media advertisement
- Local recruitment fairs
- Live radio broadcasts

Summary

Mississippi and the entire country are now in the second year of the *American Reinvestment Recovery Act*. Research supports that the federal Recovery Act has provided economic relief for many families. Working families benefited from tax relief initiatives and other programs funded through the stimulus. A current major concern of families, state agencies, and local agencies is the impact of conclusion of programs that were supported by federal funds. MAP's Community Assessment information indicates that the economy is in a recession and families are continuing to experience economic and social hardships. Mississippi consistently ranks among the poorest states in the Nation, which correlates with other social and health issues.

1. The *Mississippi Division of Medicaid* administers the *Children's Health Insurance Plan (CHIP)* in the State. Program participation is based on household income, the age of each child and insured status of each child. Many of MAP's children and families obtain healthcare service through the *CHIP* program and the Health Department. Families living in rural areas often face difficulties finding a primary care provider. MAP's Family Service Department helps to link families to medical homes in their communities for continuous healthcare services. This year's Community Assessment data reported that at the end of the program year, 6,289 families had some form of health insurance. A total of 5,568 children were enrolled in the State's medical program and 162 were enrolled in the *Children's Health Insurance Plan (CHIP)*. The State Medicaid Program budget remains a challenge as funds are limited in State government.

The *State Health Department* reports that health disparities among Mississippi's population are a major challenge, for example obesity and diabetes prevalence varies by race and ethnicity. The *United Health Foundation* reported that in Mississippi, obesity is more prevalent among non-Hispanic Blacks at 42.9% and non-Hispanic whites at 29.3%. Mississippi's overall American Health Ranking for 2010 was once again 50th in the Nation. According to the 2010 report, Mississippi's health challenges includes a high incidence of obesity for the State, a high percentage of children in poverty, a high rate of preventable hospitalizations and a high infant mortality rate.

2. Mississippi, along with the rest of the Nation has seen a decrease in teen pregnancies. This is positive data in that research has linked teen pregnancies to premature and low-birth weight babies, high infant mortality rates, high school dropout rates and negative social and economic outcomes. MAP has not received expansion funds for Early Head Start or Head Start this year. Data show a significant number of teen mothers and single mothers in MAP's counties who could benefit from Early Head Start and Head Start services. MAP continues to offer the *Child Birth Doula Program* and *Literacy Initiatives* to support

teen mothers. However, program data support the need for expansion funds for both options.

3. ***Head Start Program Information*** report showed that the majority of enrolled children live in single parent families. ***PIR*** data reported that 5,132 Head Start families were single parents. Additional information revealed that 5,961 babies were born to unmarried mothers. The highest number of births to unmarried mothers in a MAP county was Lauderdale with 649 births for the second consecutive year, followed by Lee County with 573, Warren County with 477, and Leflore County with 465. Last year, these same counties had the highest number of births to unmarried mothers. Research showed a high correlation between single female headed household and children living in poverty. ***The United Health Foundation*** annual report indicates that 31.9% of children under age 18 live in poverty in Mississippi.

The ***Mississippi Department of Human Services***, State fiscal year 2010 annual report indicated that the percentage of families receiving ***TANF*** services increased to 0.9% this year up from 0.8% last year. MAP's families were recipients of TANF services. Yazoo, Chickasaw and Claiborne counties exceed the State's percentage of 0.9% of families receiving ***TANF*** services. State records indicated a decrease in the number of ***TANF*** applications this fiscal year. Additionally the percentage of families receiving SNAP assistance significantly increased from last year; nine (9) of MAP's counties exceeded the State's average of ***SNAP*** program participants. State agencies must continue to work collaboratively to address high unemployment rates, low-wages, childcare and healthcare issues of families and children.

4. The State of Mississippi has seen an increase in the number of public Pre-Kindergarten programs. However, Mississippi does not have a state-wide funded Pre-Kindergarten program. Low-income families contend with serious barriers in obtaining quality and affordable childcare services. State Government established an Early Child Care Task force to study and address the need for improved early childcare in Mississippi. Mississippi State Childcare License Division reported 425 licensed childcare centers in MAP's service delivery area, a slight decrease from last year's report of 430 licensed centers. Childcare data showed 22,547 children enrolled in licensed childcare centers this year compared to 17,943 last year in MAP counties. The total number of preschool age children (0-4) in MAP's service delivery area reported 57,928; of that number 22,547 were enrolled in non Head Start licensed childcare facilities, 5,925 were enrolled in MAP centers and 3,584 were enrolled in public Pre-Kindergarten.
5. MAP provided quality disability service to enrolled children and families during the school year. Partnerships were enhanced and strengthened to identify children with special needs.
6. Mississippi's economy is still experiencing a recession. Low-wage earning jobs and lack of jobs hinder families from moving toward self-sufficiency. Mississippi's employment outlook has improved slightly. ***The Labor Department Report*** showed a State unemployment rate of 10. % for May 2011, which represent an improvement from May of 2010 last year rate of 11.2%. This year's ***Community Assessment***, eighteen (18) of MAP's counties exceeded the State annual average unemployment rate of 10. %. Scott County has the lowest rate of unemployment in MAP's service area, at 8.3%. Claiborne County posted the highest unemployment rate for MAP counties at 17.6%.

The purpose of this ***Community Assessment*** is to conduct an in-depth evaluation of MAP's twenty-five (25) counties service area. Assessing, reviewing and identifying local strengths, challenges, resources and opportunities that impact children and families are also evaluated. This document assists in the development of program options, goals and objectives. It aligns with the program's mission and philosophy. It is a tool that will assist to enhance and strengthen MAP's State-wide Collaboration System. Stakeholders all have a vested interest in moving families and communities toward higher self-sufficiency. MAP continues to collaborate with local providers, institution of higher learning, local educational agencies, community colleges, and local business to maximize services for enrolled families.

The following goals will be implemented to address findings in this report:

Operational Program Objectives

- ❖ Maximized opportunities for positive child outcomes and school readiness skills.
- ❖ Conduct a multi-media campaign to enhance Head Start's ¹ image throughout MAP's service area.
- ❖ Seek funding for program and health services in order to offset the rising costs of child health services due to limited funding through the State's Division of Medicaid (SCHIPS).
- ❖ Target recruitment activities for teen parents in Head Start in order to address the high percentage of teen pregnancies in the State.
- ❖ Make extra effort to recruiting and serving single parents in order to provide services and activities to ameliorate negative social consequences of single parent households.
- ❖ Increase parent education activities in order to improve education and literacy rates among Head Start parents.

Goals and Objectives by Region

Region I

- To achieve full enrollment Region wide prior to June 6, 2010 and maintain an active waiting list at each center.
- Strengthen existing Partnerships and explore the possibility to develop new ones.
- To maintain full enrollment and a 20% waiting list at all Centers.

- Develop and implement effective strategies to increase parental participation and involvement.
- Implement conflict resolution training for all Center Administrators and Staff.
- Implement Ethics training for all employees in Region 1.
- Utilize MAP's Distance Learning Program to its fullest capacity, by beginning to partner with local colleges and universities, making it possible to provide educational classes via Distance Learning.
- Continue to partner with PRC (Pearl River Community College) to ensure that all required classes are made available for Teachers and Teachers Aides who are currently pursuing degrees in ECE.

Region II

- To obtain and maintain Full Enrollment of students with an adequate waiting list at each Center.
- To ensure that ninety-eight percent (98%) of all children enrolled receive health services.
- To obtain the Non-Federal Share quota assessment of the Region.
- To maintain eligible staff and fill vacancies with qualified competent people.
- To conduct on-going monitoring of each Center's operation and management program.
- To establish and maintain partnership agreements and positive working relationships with community-based programs (Schools, Pre-schools, Developmental Program, Businesses, Vendors, Organizations, etc.).
- To initiate and implement work simplification measures and training for staff as needed or specified to improve job performances.
- To encourage positive attitudes and appreciation throughout the Region.

Region III

- To identify additional physicians and dentists in each county (To receive services in a timely manner).
- Maintain full enrollment at all Centers with a 20% waiting list.
- Continue the Lead Poison Program to the Community in 2011-2012.
- Continue to support the Male Initiation Program.

- To identify and continue Partnership Agreements with Public Schools and other agencies in the Region.
- To make sure enrollment is met before the closing of school in 2012 (Registration will be ongoing thru out the school year in assurance of full enrollment at the close of the year).
- Monitor Child Plus on the computer (To assure all services rendered are input into computers).
- Report 100% Volunteer/In-Kind by end of Grant Year (Have each Center divide their Annual Quota by nine (9) months and report this amount each month. By doing so, they will have reached their 100% by November 30).
- Improve on transportation services.
- Maintain 85% Average Daily Attendance at all Centers.
- Provide Education and Health & Safety Workshops for Staff and Parents.
- To repair Center facilities where needed.
- Encourage staff to continue their education to receive their Bachelor's or Master's Degree.

Region IV

- Continue to increase awareness to the risks, symptoms and treatments of Lead Poisoning.
- Increase Head Start Awareness in the local communities.
- Increase funded enrollment for Early Head Start.
- Improve in the area of volunteer and in-kind.
- Increase participation of males in the Male Initiative Projects.
- Increase the number of teachers with obtaining a Bachelor's or Master's Degree in Early Childhood Education.
- Assist at least five families with home ownership.
- Assist at least ten parents to obtain a GED.
- Assist at least ten parents to enroll in a two or four year university in the program of study of their choice.
- Assist at least 10 teacher assistants to with obtaining an AA or BS Degree in Early Childhood Education.
- Offer leadership training to center administrators.

- Offer conflict resolution training to center administrators, teachers, and family community workers.
- Increase attendance and moral among employees.
- Offer more classes leading parents and staff to self-sufficiency
- Offer parenting skills to parents.
- Maintain full enrollment with a 20% waiting list.
- Increase the number of nutrition staff with Tummy Safe or Serve Safe Certification.
- Ensure that 99% of all children receive health services.
- Monitor manual and computer records for complete compliance.
- Improve transportation services in Leflore County.
- Recruit more education staff with credentials.
- Recruit more local providers to provide health services.
- Develop more community partnerships.
- Obtain a new facility for the Itta Bena Head Start Center.

Region V

- Strengthen existing partnerships and develop new ones.
- Encourage staff to continue taking advantage of opportunities to enhance their professional development.
- Monitor more closely to ensure services to families and children are being provided in a timely manner.
- Encourage parents to take advantage of educational opportunities and offer more classes leading parents to self-sufficiency.
- Increase Public Relations.
- Implement ways to improve facilities at Pisgah and Booneville Centers.
- Implement strategies to increase parental involvement.
- Encourage more participation of males in the Male Initiative programs.

Region VI

- Begin application process for NAEYC Accreditation.
- Explore partnership options and strengthen existing partnerships.
- Increase Public Relations at all centers.
- Optimize use of Distance Learning and Online Degree Programs.
- Increase Male Participation.
- Increase Healthy Me Activities to include parent.
- Continue Parenting Classes.
- Explore and implement staff morale boosters.

Region VII

- Renovate Exhibit Hall Center.
- Secure more community involvement and support.
- Provide more in-depth training for parents.
- Increase male/parent participation.
- Maintain qualified staff.
- Encourage staff to continue educational goals.
- Work closely with LEAs to become more involved with children with disabilities.
- Maintain funded enrollment.
- Secure an additional classroom of 15 or 20 children.

Region VIII

- Gain Mississippi Quality Steps System Star Rating of at least three (3) for each center and implement strategies to regain NAEYC accreditation at Yazoo City Center for the next school year.
- Improve parent involvement program by working more closely with the collaboration network and other community partners including Health Services Advisory Committee to assist parents and families in meeting their goals and children health requirements.
- Provide training opportunities for all staff throughout the year that meets Childcare

Licensure requirements for the 15 staff development contact hours.

- Provide CLASS training for all staff and more skill-based training for staff working with children with disabilities to help ensure quality service delivery and effectively-managed classrooms.
- Develop new partnerships with public school systems and strengthen existing partnerships within the Region that better supports the program.
- Advertise and promote Head Start services more aggressively through local media outlets (newspaper, radio, internet, and television).
- Acquire survey data for an assessment of need to implement a full-day/full-year program for children at centers within the Region for the following school year.
- Continue working with the local housing authority to acquire additional “state of the art” Classrooms and meeting space.
- Identify and provide leadership and conflict resolution training for Center Administrators and other support staff.
- Recruit and maintain full enrollment of children.
- Secure adopters for the Adopt-a-Center program and other local commitments/agreements for the acquisition of 100% non-federal share.

Region IX

- To maintain full enrollment and average daily attendance of 85% or more monthly.
- Continue to seek opportunities to improve parent involvement and parenting skills.
- Conduct more Regional workshops and training geared toward fulfilling the goals and interest of our parents.
- Encourage staff to continue their education.
- To meet our non-federal share quota.
- Strengthen and increase public relations.
- Provide In-Service training pertaining to leadership and compliance for Center Administrators.
- Work more closely with public school's education staff to improve our children's school readiness skills.

- Identify and maintain qualified staff.
- Encourage each center to work with communities on projects that promote education and growth.
- Maintain at least 20% on each center's waiting list.

Region X

- Strengthen existing partnerships.
- Develop partnership agreement with North MS Medical Center Health Services
- Review and revise the Community Resources Guidebook for Region X local area to use as a guide to assist families.
- Develop positive relationships between staff, families, and community agencies in local area.
- Develop and strengthen partnerships with local school districts.
- Encourage teachers and assistant teachers to pursue higher education degrees.
- Meet non-federal share quota.
- Meet 45 and 90 day deadlines for services to children.
- Regional Manager will serve on the advisory board for Itawamba Community College Child Development Associate Degree program to assist with recruiting highly qualified staff.
- Recruit and maintain full enrollment.

Services

Healthcare and Prevention

The Health Services area continues to provide comprehensive medical, dental, and nutritional services to all children enrolled in the Program. Our primary goal is early detection and prevention through numerous screenings and follow up procedures. Linking families to long term medical homes is a priority because of the vast and diverse needs of incoming enrollees. The health services area takes pride in working with parents, soliciting their input, concerns, and observations. Mississippi Action for Progress, Inc. adheres to all policies and guidelines set forth regarding the **Health Insurance Portability Accountability Act (HIPAA)** security and privacy compliance.

Additional key areas for promoting health awareness are weight control, asthma, and juvenile diabetes among young children in all centers for staff, families, and parents have been established. Ongoing training sessions, as well as, video overviews/orientation discs are available to all centers, staff, and parents. Parents receive training on good eating habits for children to avoid obesity, asthma in young children, and how to help educate the parents of children with diabetes.

The health services area is responsible for the following:

- Early intervention through education
- Health Screenings (including lead testing)
- Health Fairs
- Early Prevention Screening Diagnostics and Treatment (EPSDT)
- State Child Health Insurance Program (SCHIP)
- Medicaid
- Health Tracking
- Women Infant and Children (WIC), as well as, promoting breastfeeding (for infants)
- Health Consultants
- Nutritional Services (to insure maximum gain in dietary practices). A revised Food Guide Pyramid is distributed annually to insure adequate intake of grain, vegetables, fruit, milk, meats, fats, and sweets.
- Emergency services plans are updated annually and distributed to each classroom.
- Health training to address issues such as juvenile diabetes, obesity, autism, and asthma in young children for staff and parents
- Health Advisory Committees (Local and State level)
- Addressing needs of diverse families through multi cultural staff and translated documents
- Meeting deadlines to ensure quality services for children and families are being met
- Participation in the Oral Health Coalition – MS Department of Health

Male Involvement Program

The Male Involvement Program continues to implement successful workshops and activities, as well as involve more males in the process. According to the U. S. Department of Education, the chances of a child's school work excelling increases as much as 42% when fathers are involved. In fact, there are many positive impacts made as a result of fathers being involved with their children. Some are: (1) children experience more success in school, (2) children are more likely to get A's and less likely to repeat a grade, (3) children have high self esteem, (4) children exhibit empathy and pro-social behavior, (5) and avoid high risk behavior, drugs, criminal activity and truancy. Therefore, staff is constantly encouraging fathers and males to become involved and stay involved in their children's lives.

The workshops presented in 2010/2011 were:

- Anger Management
- Building Your Child's Self Esteem
- Basic Principles of Good Parent/Child Communication
- Growing A Happy Child
- Child Support
- Men's Health Issues
- Making A Happy Family
- School Readiness
- Smart Discipline
- Balancing Work and Family
- Working with others

This year the Male Involvement Program at MAP put forth a concerted effort to provide community service at the Head Start centers. These services came in the capacity of: serving as greeters, delivering baskets to seniors needy at Christmas, coordinating a Teachers Appreciation Day, reading in the classrooms, collecting toys for needy children, renovating and building a sandbox, replaced gravel, repaired toys, and provide interior and exterior work in and around the Head Start center.

The Male Involvement Program continues to provide volunteer efforts such as, Breakfast with Dad, Lunch with Dad, Science Fair, Career Day, Bicycle Safety, Grandparents Day, Fun Night With Dad, Easter Egg Hunt, Carving Pumpkins, Doughnuts with Dad, Day in the Park, Dad and Me Fashion Show, Lowe's Build a Project.

The Male Involvement Program at MS Action for Progress, Inc. is using the Action Plan: Great Dad curriculum (a national fathering curriculum designed to turn the hearts of fathers toward their children) which has not only proven to be a worthwhile program, but it continues to make a tremendous impact on **Child Development** in the state of Mississippi.

Child Progress Indicator (CPI)

The Child Progress Indicator is a locally designed assessment instrument used by the agency to meet the Child Outcomes mandate of 2000. This instrument is research based and has been field tested for validity and reliability. It is used to collect data three times a year, determine children's strength, and ultimately set goals for each individual child to maximize their potential.

We are continuing to provide assistance and support in the area of ***Phonological Awareness*** where the children are scoring below average. The area was revised and workshops/seminars were conducted to provide assistance and support to the classroom teachers. During the upcoming school year, the program will continue to incorporate a variety of literacy materials to enhance the awareness to the children in this area. *Links to Literacy* will be used which focuses on early literacy skills. Teacher mentoring, and parental support will also be a focus in this area. This support will be continuous and strategies will vary until results show improvement not only for the child but for the classroom staff and parents.

The **CPI** assessment is currently being revised to include new domains – (1) Logic & Reasoning, (2) Social Studies Knowledge & Skills, and (3) English Language Development. The English Language Development domain applies only to children who are dual language learners.

Child Outcomes Report – see addendum back section.

National Accreditation Efforts

The agency will pursue possibility of accreditation of several sites. *The accreditation sources being considered are National Association for the Accreditation of Youth Children (NAEYC) and Association for Childhood Education International (ACEI) for possible assistance in this area. ACEI is the institute that provides assistance to the program in the form of workshops and program review prior to the site visit for NAEYC accreditation.* We will continue to upgrade centers, provide workshops and trainings, as well as provide assistance where needed to ensure that this process is successful.

Adult Education and Family Literacy

To assure that each family functions at their highest potential each family members educational and literacy levels will be assessed. This assessment will allow for linkage to the appropriate social service agency for each family member in need of educational and/or literacy services. Families will benefit from services such as:

- Adult Basic Education (ABE)
- Continuing Education, Vocation/Technical Training
- General Equivalence Diploma (GED)
- Parenting Courses, Employability Skills

- Exploring Self Sufficiency

Throughout the school year the Mississippi Action for Progress, Inc. will continue to work with families to assure that services are attained directly (onsite) or indirectly (referral agency).

Community Partnerships

To assure that services are available to families being served within the program and community it is necessary to for cooperative agreements with various agencies be formed. Community Partnership Agreements are negotiated based on the need for services for families being served by Mississippi Action for Progress, Inc. and the agency providing the service. Examples of agencies being partnered with are:

- Civic Leaders and Public Officials
- Colleges and Universities
- Community Based Organizations
- County and Public Schools
- Department of Human Services
- Faith Based Organizations
- Health and Wellness Professionals and Practitioners
- Local Businesses
- Mental Health Agencies
- MS Cooperative Extension Services

Community Partnerships are monitored and updated annually to assure that families are receiving necessary services in a timely manner and to assure that these services are beneficial to all involved.

Family Partnerships

The Family and Community Partnerships staff will work with families on a regular basis, beginning at enrollment to establish Family Partnership Agreements. These agreements will allow the staff to support families as they work to accomplish their goals.

Mississippi Action for Progress, Inc. will organize and lead activities planned to enhance social development of the entire family unit, ultimately leading to the accomplishment of goals. Parents and/or families will be offered opportunities and support for growth by allowing them to identify their own strengths, needs and interests, and finding their own solutions. When families are hesitant in forming Family Partnership Agreements we will make every effort to reach them throughout the program year and all attempts will be documented. It is our objective to support parents and/or families as they identify and meet their own goals, nurture the development of their children in the context of their family and culture, and advocate for communities that are supportive of children and families of all cultures.

We will continue to partner with community organizations to provide the highest level of services to children and families fostering the development of a continuum of family centered services and advocating for a community that shares responsibility for the healthy development of all children and families. All of this will be done through a comprehensive Family Partnership building process with regular monitoring and follow-up. Mississippi Action for Progress, Inc. recognizes the importance of healthy families and communities and strives to build partnerships that will have a positive impact on the quality of life for children and families.

Disability Services*

Mississippi Action for Progress, Inc. is committed to providing quality services to all children. ***“A Special Place for Special Children”*** is a motto that Mississippi Action for Progress, Inc. strives to implement on a daily basis for children with special needs. Ten percent of our total enrollment slots are allocated for children with special needs who meet the criteria for disabilities in 1305.2(a). This allows children to interact with their peers. They are given the same opportunities as any other child to experience life in their least restrictive and developmentally appropriate goal oriented environment.

While enrolled at Mississippi Action for Progress, Inc., children are exposed to a holistic approach to Early Childhood Education based on the various theories of child development and developmentally appropriate activities. Children with special needs are introduced to activities in the Head Start Centers that allow them to work on skills and behavior that other children their age are acquiring. These activities are individualized to meet the specific needs of each child.

Related services such as Physical Therapy, Occupational Therapy, Speech Language/Hearing services, Mental Health and others are provided through the holistic approach, as well. The nurturing relationship that is developed between the teacher and the child supports the motto, ***“A Special Place for Special Children.”*** MAP, Inc. makes every effort to work closely with local school districts, Early Invention and other agencies to provide services and a smooth transition for children with special needs and parents into and out of the Head Start. The Disability Services area strives to advocate for the following:

- Identify, evaluate and coordinate services for children and their families with special needs
- Make every effort to work closely with local school districts and agencies to provide needed services to children with disabilities enrolled in the program – ***Coordinating Collaborative Agreements with the LEAs***
- Assist the families through referral when necessary
- Work with parents to ensure that they are educated about their child’s disability and make them aware of their child’s rights as much as possible
- Work closely with the classroom teacher to make sure the teacher has the knowledge and skills necessary to work with special needs children
- Work to prepare young children with special needs and their parents for future success in school and in life
- Work closely with parents to develop/encourage a relationship with the LEA and staff that are providing services to their children
- Assist in developing interagency agreements with local school districts and ensuring they are updated regularly

Mental Health

This area is the cornerstone of MAP's holistic approach. It is implemented on three distinct levels: prevention, intervention, and treatment. Services are available to families, children, and staff through the Mental Health Content area. In order for parents and staff to develop an ongoing nurturing environment, being mentally healthy plays a very important role. Like hot air balloons, children rise at different levels and nurturing can help them soar to their highest potential. MS Action for Progress, Inc. is truly "*A Special Place for Special Children.*" MAP recognizes mental health as an important part of the children's overall health and well-being. Local community resources are identified in order to obtain information, screenings, and referrals. Mental Health providers are encouraged to describe techniques to teachers and parents that help children adapt to various situations, as well as describe ways that caregivers can nurture young children.

Additionally, teachers understand that they must model and exhibit appropriate behavior because preschool children imitate what they see. The Mental Health area strives to promote the following:

- Provide activities that encourage social and emotional development of children in the program
- Assist with family support issues, such as natural disasters, substance abuse, domestic violence, depression, or other stress related issues
- Ensure teaching staff and disability assistants are skilled in working with children and families dealing with behavior and family functioning
- Promotion of mental wellness, encouraging positive social relations in children is our goal
- Support a teacher who may feel a child is experiencing difficulties or exhibiting inappropriate behavior in the classroom would benefit from mental health services
- Contact parents to discuss situations of concern. Many preschool children experience periods of non-compliance and stress
- Perform general classroom observations, periodically throughout the school year to ensure that our environments are responsive and positive in meeting children's needs

Other routine areas promoted in Mental Health are:

- Promoting positive relationships with others
- Understanding and accepting differences
- Communicating with young children
- Transitions and routines
- Building self-confidence
- Separation Anxiety
- Understanding different emotions
- Promoting decision-making skills

Special Projects

Mississippi Action for Progress, Inc (MAP) has been afforded the opportunity to collaboratively work with the Mississippi State Department of Health (MSDH) and its Healthy Homes Division to introduce and educate children and families on Lead Poisoning Awareness and Prevention, in addition to recognizing environmental and safety hazards to create a healthy home.

The purpose of this program centers on enhancing awareness, educating parents and healthcare providers, and the general public about lead poisoning and exposure. This particular program is primarily based in five counties: **Lauderdale, Leflore, Simpson, Tallasatchie, Warren and Yazoo**. Issues addressed include, but are limited to exposure to toxic products and materials by way of contaminated water and food, air pollution, and exposure to lead. In addition, MAP feels that it is necessary to address pertinent health concerns, since exposure to lead adversely affects Head Start age children (under the age of six); regarding learning and development, health, and overall wellness.

For the most part, the program's main objectives are to facilitate community-based seminars and workshops, distribute printed information, and implement a systematic referral system to detect conditions of exposure and treat lead poisoning. Through our collective educational efforts, we hope that this program will instill the kind of knowledge that will heighten the awareness of prevention strategies and continue to build strong ties within and around the community. Additional information on the state's Lead Prevention Program can be found at http://msdh.ms.gov/msdhsite/_static/41,0,176.html

CHILD PASSENGER SAFETY SEAT PROGRAM

Mississippi Action for Progress, Inc (MAP) has been granted the opportunity to partner with the Mississippi State Department of Health, Office of Preventive Health, to offer a child passenger safety seat program. The purpose of this partnership is to help eliminate and reduce the number of deaths and injuries sustained by children while riding in a motor vehicle, and increase availability of child safety seats for needy families. Educational trainings, workshops and presentations are available to parents to include hands-on demonstration sessions on car safety seats and installation. The program also provides pertinent information on the current State of Mississippi laws regarding seatbelts and the child restraints system.

Designated MAP staff members have been certified as child car seat safety technicians by Safe Kids of Mississippi, a State coalition through Safe Kids USA with a mission of preventing unintentional childhood injury. Safe Kids USA is a coalition network with more than 600 coalitions and chapters in all 50 states bringing together health and safety experts, educators, corporations, foundations, governments and volunteers to educate and protect families. Additional information can be found on their website at www.safekids.org

FIRE SAFETY PROGRAM

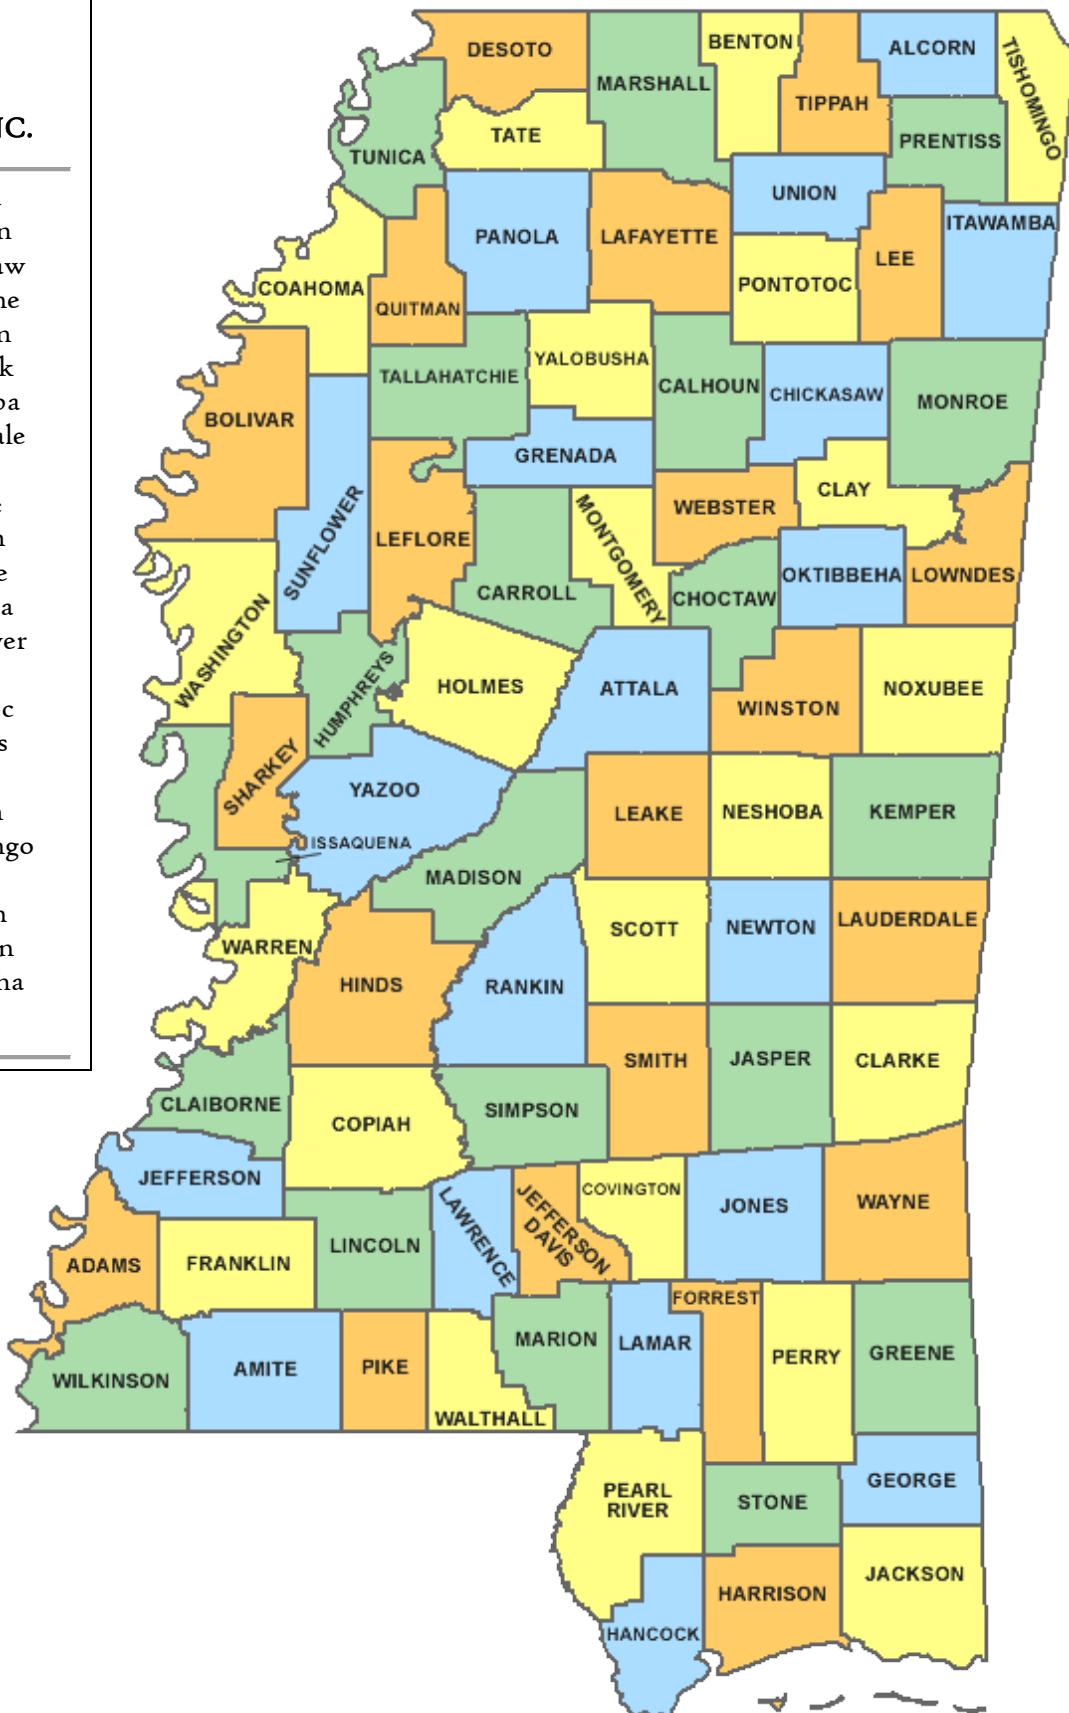

Mississippi Action for Progress, Inc. (MAP) was given the opportunity through the Mississippi State Department of Health, Office of Prevention, to educate young children and center staff on Fire Prevention and Safety. The program's focus was on educating children and center staff on fire prevention safety through the use of video and participation in demonstrations that involved fire safety. Materials were given to children to take home to parents re-educating them about an escape plan; they were also given safety stickers, crayons and coloring books with fire prevention and highlighted safety tips.

Disability Profiles

(IN MAP SERVICE AREAS)

DISABILITIES SERVICES PROFILE

2010 - 2011

The following profile information identifies children with disabilities, *by type and age*, in MAP's Service Areas who receive special education services from the Mississippi Department of Education.

(In accordance with the Mississippi Department of Education, Office of Special Education, standard practice, cell sizes of 10 or less are suppressed in order to protect the personally identifiable information of students with disabilities and their families)

Disability	Age 3	Age 4	Age 5	Age 3-5
Autism	25	67	84	176
Deaf-Blind	0	0	0	0
